

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A pet house substantially formed from a unitary blank of material; the house being foldable from a collapsed state for shipping and storage to an erect state for use; said house comprising:

a bottom; said bottom having first, second, third and fourth edges;

first and second side walls attached to one another forming an apex at the top of said house; said first side wall attached to said first edge of said bottom;

at least one slot in said bottom near said second edge;

at least one locking tab extending from said second side wall; said locking tab received in said slot; and

first and second end walls; said first end wall having an opening therein to permit the pet to enter and exit said house; said first end wall attached to said third edge of said bottom; said second end wall attached to said fourth edge of said bottom; a means for attaching said first end wall to said first and second side walls; a means for attaching said second end wall to said first and second side walls; and [I-]

first and second extensions attached to said first end wall and third and fourth extensions attached to said second end wall; said first and third extensions being fastened to said first side wall; said second and fourth extensions being fastened to said second side wall.

2. (Cancelled)

3. (Currently Amended) A pet house as set forth in Claim 1 [[2]] further including at least one hole in said first extension; a first hole along one edge of first side wall; said hole in said first extension aligning with said first hole forming first aligned holes; a first clip received in said first aligned holes; at least one hole in said second extension; a second hole along one edge of said

second side wall; said hole in said second extension aligning with said second hole forming second aligned holes; a second clip received in said second aligned holes; at least one hole in said third extension; a third hole along another edge of said first side wall; said hole in said third extension aligning with said third hole forming third aligned holes; a third clip received in said third aligned holes; at least one hole in said fourth extension; a fourth hole along another edge of said second side wall; said hole in said fourth extension aligning with said fourth hole forming fourth aligned holes; a fourth clip received in said fourth aligned holes.

4. (Original) A pet house as set forth in Claim 1 wherein said at least one slot includes a plurality of slots and wherein at least said one locking tab includes a plurality of locking tabs.
5. (Original) A pet house as set forth in Claim 4 wherein each locking tab includes a shaft and a head; said head extending into the inside of said house.
6. (Original) A pet house as set forth in Claim 5 wherein each of said shafts extend around said fourth edge of said bottom.
7. (Original) A pet house as set forth in Claim 1 wherein each side wall includes a short vertical section and a long section; said long sections, together are substantially in the shape of two legs of a solid isosceles triangle.
